Re: Lower May Creek / Windtree Sewer Improvements

Dear Neighbors:

The new sewer system is complete and ready for connections!

The Lower May Creek / Windtree Sewer Improvements in the southern portion of the District are now complete. Final costs for the project have been determined and the District Board of Commissioners adopted Special Connection Charges at the March 26, 2008, Board meeting.

If you choose to connect your home to the new public sewer system, you may now pay the connection charges assigned to your property and connect your property to the public sewer.

For information on connection charges, you may visit the District's web sight at www.ccud.org or you may visit the District office to discuss details regarding the connection of your home to the new system. Please have your property tax identification number available when you visit the District website, visit the District office, or contact us by telephone or email.

Sincerely,

Thomas Peadon
General Manager
